**Section II: Location of Aquatic Plant Removal (cont.)**

What type of aquatic plants below the Ordinary High Water Mark are proposed to be removed? (check all that apply)

- Emergent (above water level)    
  Submergent (below water level)    
  Floating Leaf (at the surface i.e. lily pads)

**Section III: Map & Property Ownership**

Attach a copy of a lake map that includes the property(s) to be harvested. If no printed map is available, provide a sketch of the site at the bottom of this page. On the map, identify the following required information.

- Area and dimensions of each proposed plant removal area.
- Location of all riparian neighbors (property owners riparian to and adjacent to the proposed removal area) including project participants and non-participants. Consecutively number each riparian neighbor (both project participants and non-participants). In the space below:
- Name all riparian owners, including project participants & non-participants. The number should correspond with the numbered properties on the map. Attach additional sheets if necessary.
- Check Yes box to indicate project participants and No box for non-participants.

No.	Name of Riparian Neighbor	Project Participant	Control dimensions (calculated acreage)
1.	See attached sheets of participants	<input type="radio"/> Yes <input type="radio"/> No	_____
2.	_____	<input type="radio"/> Yes <input type="radio"/> No	_____

Check here if separate sheets are attached identifying additional neighbor riparian owners. Indicate project participants and/or non-participants.

Check here if printed map attached. If no printed map, use this space to sketch the site and provide required information.

**Section IV: Methods**

What mechanical or manual methods to remove plants are proposed? (check all that apply)

- Mechanical harvesting    Raking    Other Specify Other:  
 Hand Pulling    Cutting    Alum

If alum treatment is proposed, has a plan been developed?    Yes    No   If yes, please include the plan with this application.  
 Please explain why you selected the proposed cutting method(s).  
 because it complies with the APM plan, it opens up recreational access and it reduces fragmentation

**Note:** Other control methods (i.e. bottom barriers, weed rollers, herbicides) also need DNR permits. Contact this office for more details.

**Section V: Fees**

Fees are not refundable and are calculated as follows:

Check box for type of project:

- single riparian area, one property owner, less than one acre ..... **\$30.00**
- multiple riparian areas, offshore control areas, multiple riparian properties, one acre or greater \$30.00/acre (round up to the nearest whole acre)  
 If proposed removal is greater than 10 acres fee caps at \$300.00

302 acres x \$30.00 per acre = \$9,060.00  
 Total non-refundable fee enclosed (max \$300.00) ..... \$300.00

**Section VI: Reasons for Aquatic Plant Removal**

Purpose of Aquatic Plant Removal

- Maintain navigational channel for common use  
 Maintain private access for boating  
 Maintain private access for fishing  
 Improve swimming

**Note:** Consider feasibility of alternatives for each control site. This information not only helps the department make a decision on this application but also helps you evaluate your investment in aquatic plant management.

Describe the level of success for alternative methods previously used:

- Chemical                      SSW control, opens navigational access in shallow water
- Dredging                      not applicable
- Drawdown                      not applicable
- Nutrient controls in watershed ongoing
- Nutrient controls on property ongoing
- Other

**Section VIII: Applicants Responsibilities**

1. The applicant has prepared a detailed map, which shows the length, width and average depth of each area proposed for the control of rooted vegetation.
2. The applicant understands that the Department of Natural Resources may require supervision of any aquatic plant management project involving removal. Supervision may include inspection of the proposed treatment area and/or equipment, before, during, or after removal. The applicant is required to notify the regional office 4 working days in advance of each anticipated date of plant removal with the date, time, location and size of plant removal unless the Department waives this requirement. The advance notification may be specified in your permit.
3. The applicant agrees to inform all operators of harvesting equipment of the conditions and terms of this permit and to insure that all operators understand and abide by those terms and conditions.
4. The applicant agrees to comply with all terms and conditions of this permit, if used, as well as applicable Wisconsin Administrative Rules. The required fee is attached.
5. Conditions related to invasive species movement. The applicant and operator agree to the following methods required under s. NR 109.05(2), Wis. Adm. Code for controlling, transporting and disposing of aquatic plants and animals, and moving water:
  - Aquatic plants and animals shall be removed and water drained from all equipment as required by s. 30.07, Wis. Stats., and ss. NR 19.055 and 40.07, Wis. Adm. Code.
  - Operator shall comply with the most recent Department-approved 'Boat, Gear, and Equipment Decontamination and Disinfection Protocol', Manual Code # 9183.1, available at <http://dnr.wi.gov/topic/invasives/disinfection.html>

I hereby certify that the above information is true and correct and that copies of the application have been provided to the appropriate parties name in Section II and that the conditions of the permit will be adhered to. All portions of this permit, map and accompanying cover letter must be in possession of the applicant or their agent at time of plant removal. During plant removal activities, all provisions of applicable Wisconsin Administrative Rules must be complied with, as well as the specific conditions contained in the permit cover letter.
