

PETITION

Petitioner herein, being a land owner with land in the Norway/Dover Drainage District under the jurisdiction of the Racine County Board of Drainage Commissioners, hereby states as follows:

1. That the Norway/Dover Drainage District currently includes 1,868 parcels.
2. That, based upon the attached report of Gerry Griswold, there are an additional 3,109 parcels outside of the drainage district receiving the benefits of the drainage district, but such benefits were not evident or inadvertently overlooked at the time of organization of the District.
3. That the benefits received by such 3,109 parcels outside of the drainage district are the same pecuniary benefits received by parcels currently within the district from the maintenance and improvement of the drainage canal and drainage district field tile for the drainage of water or protection of land from water.
4. Therefore, your petitioner requests that the Racine County Board of Drainage Commissioners under Section 88.78, Wis. Stats., annex the benefitted lands into the Norway/Dover Drainage District and assess benefits and costs as it does for other lands already in the drainage district.

Dated at Racine County, Wisconsin this 15th day of April, 2009.
